Climate normals Chur

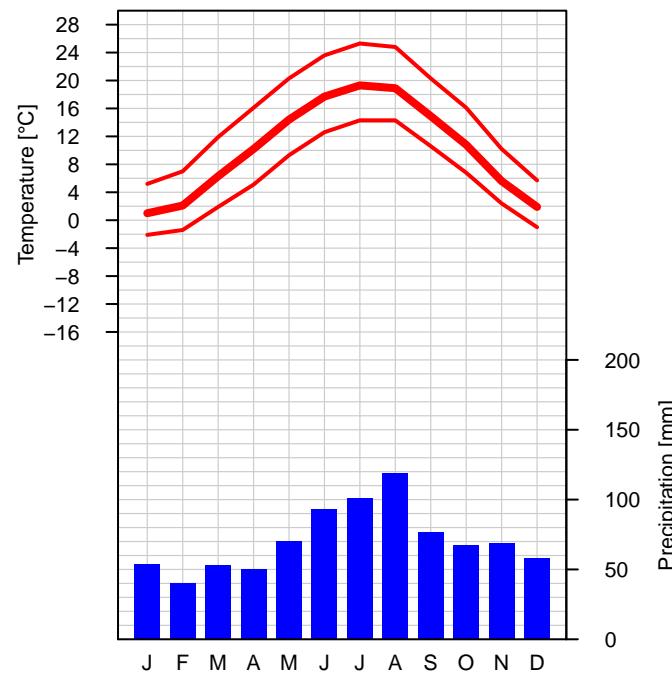

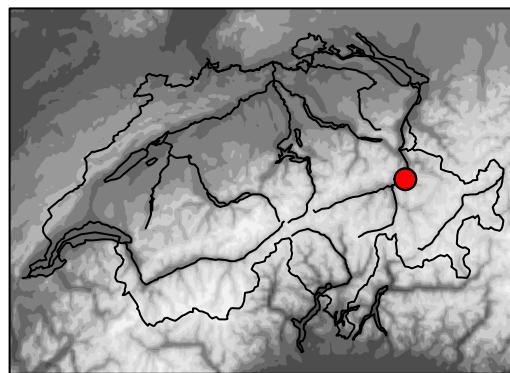

Reference period 1991–2020

Legend:

Climate graph:

Graph showing long-term means of monthly mean temperature, mean monthly maximum and minimum temperature as well as monthly precipitation sums of a certain measuring site.

Table:

Long-term means of monthly mean values and monthly sums of different climatological parameters. Missing values (no measurements or measuring period too short) are labeled as "-".

Temperature [°C]

monthly mean temperature

Maximum temp [°C]

monthly mean of daily maximum temperature

Minimum temp [°C]

monthly mean of daily minimum temperature

Ice days [days]

number of days with maximum temperature below 0° Celsius

Frost days [days]

number of days with minimum temperature below 0° Celsius

Summer days [days]

number of days with maximum temperature equal to or above 25° Celsius

Heat days [days]

number of days with maximum temperature equal to or above 30° Celsius

Sunshine [h]

measured sunshine duration

Sunshine [%]

ratio of measured sunshine duration to possible sunshine duration

Bright days [days]

number of days with sunshine duration greater than 80%

Cloudy days [days]

number of days with sunshine duration less than 20%

Precipitation sum [mm]

monthly precipitation sum

Precipitation X mm [days]

number of days with precipitation equal to or above X mm

Precipitation X%-q [mm]

X%-quantile of the monthly precipitation sums (0%: lowest value;

40%: 40%/60% of the values are lower/higher than this value; 100%: highest value)

Attention: Annual values do not correspond to the sum of the monthly values.

Snowfall [cm]

monthly snowfall sum

Snowfall [days]

number of days with snowfall equal to or above 1 cm

Snow cover > X cm [days]

number of days with snow cover above X cm

Relative humidity [%]

monthly mean of relative humidity

Vapor pressure [hPa]

monthly mean of vapor pressure

Air pressure station [hPa]

monthly mean of air pressure at station level

Air pressure red. sea [hPa]

monthly mean of air pressure reduced to sea level

Wind speed [m/s]

mean monthly wind speed

Wind X m/s [days]

number of days with wind speed (10min mean) equal to or above X m/s

Visibility < X m [days]

number of days with visibility < X m (at least once a day). A visibility below 1000 m is also called fog.

Homogeneous data series were used to calculate long-term means for the parameters shown in italics. The selection of the parameters is based on the guidelines of the World Meteorological Organization (WMO-No. 1203). The values can change due to continuous quality control and homogeneity updates. Further information on the Swiss climate and on the homogenization topic can be found on www.meteoswiss.ch.
